

Supplementary Figure 1(a)

**Prostate:** Variation of prescription dose (symbol) and error bars representing minimum and maximum delivered dose to the target volume among different treatment planning systems. These data include dose to original and sequential cone down treatment volumes. Larger the error bars, higher is the variation.

Supplementary Figure 1(b)

**Head and Neck:** Variation of prescription dose (symbol) and error bars representing minimum and maximum delivered dose to the target volume among different treatment planning systems. These data include dose to original and sequential cone down treatment volumes. Larger the error bars, higher is the variation.

Supplementary Figure 1(c)

**Brain:** Variation of prescription dose (symbol) and error bars representing minimum and maximum delivered dose to the target volume among different treatment planning systems. These data include dose to original and sequential cone down treatment volumes. Larger the error bars, higher is the variation.
